

ORTHOPEDIC SURGERY DIRECTORY

Mat-Su Regional Medical Center provides comprehensive orthopedic care for knees, hips, shoulders and backs – including an orthopedic robotic program that enables surgeons to perform minimally invasive procedures for partial knee, total knee, and total hip replacement with smaller incisions, which may result in less pain, faster recovery and increased joint mobility. Mat-Su Regional is the only hospital in Alaska with this technology. And at Mat-Su Regional, our skilled orthopedic team will see you through every phase of care, from pre-op education through your last inpatient therapy session.
